PROJECTS

1. Online restaurant check-in application **ListToTable** group project built by team of four.

 Live - www.listtotable.com ‖ **GitHub**

My contribution:
- Sign up, login and check in forms built with **ReactJS, Redux, MaterializeCSS.**
- Restaurant-side design prototype with **Sketch, HTML** and **CSS,** routing, debugging.
- Worked tightly with backend team to establish correct connection between UI and DB.

2. Game streaming application based on Twitch API - **Twitch Buddy**

 Live ‖ **GitHub**

My contribution:
- Logic functionality by **JavaScript** and **jQuery**
- Pop-up models created with **Bootstrap, HTML** and **CSS**
- Mobile responsiveness: **CSS** and mediaqueries

3. Memory-match game - **Friends Match.**

 Live ‖ **GitHub**

 - It is solo project developed with **JavaScript, CSS3,HTML5, jQuery, Bootstrap**
